Union Springs Water Stripper Back On-line

On December 6, 2016, the Village of Union Springs had to temporarily halt the operation of the air stripper that removes the volatile organic contaminants from the water supply due to a failure in the air stripper control system. This impacted residents within the Village of Union Springs and people in the town of Springport along Route 90 who obtain public water from Union Springs.

The Village of Union Springs' water treatment operator has reported that the air stripper has been placed back on-line at about 4 pm this afternoon, December 8, 2016. Water entering the distribution system from the water treatment plant is now being treated as designed.

For additional information, please contact the Village of Union Springs at 315-889-7341, Town of Springport at 315-889-7717 or 315-889-7354 or the Environmental Health Division of the Cayuga County Health Department at 315-253-1560.
